

EUCALYPTUS ALBOPURPUREA 'PURPLE-FLOWERED MALLEE BOX'

Small tree or mallee. Robust small tree with glossy green foliage and a well displayed profusion of mauve-pink flowers from August to January. Excellent small tree for gardens and general landscaping. Adaptable to most well-drained soils in a sunny position. Well suited to coastal soils. Drought, frost and salt tolerant.

5m x 2m

EUCALYPTUS BRACHYCALYX 'GILGA, CHINDOO MALLEE'

A small to medium mallee or tree with narrow green leaves, creamy white flowers and bud caps and smooth bark in grey and pink tones. An attractive feature tree for the garden with good form that attracts birds and pollinator insects. It grows in full sun in sandy loam, gravelly loam, sandy clay, clay loam and clay. It tolerates drought and frost and can be pruned to maintain shape.

3 - 10m

EUCALYPTUS INCRASSATE 'YELLOW MALLEE'

A small to medium mallee or tree with narrow grey green leaves, creamy white flowers and bud caps and rough fibrous bark with smooth upper branches. An attractive feature tree for the garden with good form that attracts birds and pollinator insects. It grows in full sun in sandy loam, gravelly loam, sandy clay, clay loam and clay. It tolerates drought and frost and can be pruned to maintain shape.

3 - 8m

EUCALYPTUS PAROSA 'MALLEE BOX'

A compact mallee or small tree with slender green leaves, white flowers and prominent bud caps, set against textured grey bark with smoother upper branches. A versatile feature plant that adds structure while attracting birds and pollinators. It grows best in full sun across sandy loam, gravelly soils, sandy clay, clay loam and clay. Hardy in drought and frost, it can be pruned to maintain a neat, balanced shape.

2 - 14m

SHRUBS

GREVILLEA 'WINPARA GOLD'

A low spreading shrub with fine, divided grey green foliage and bright golden yellow flowers that appear over a long period. A striking groundcover or border plant that adds colour and attracts birds and pollinating insects. It grows best in full sun in well drained sandy or loamy soils. Drought tolerant once established and lightly frost hardy, it responds well to pruning to maintain a dense, tidy shape.

2m x 2m

GREVILLEA 'RED SUNSET'

A very useful low and naturally dense and rounded growing small shrub. It has red to orange spider type flowers which are very attractive to nectar eating birds and insects, produced in profusion in winter and spring. It suits a wide range of climates from sub tropical to cool temperate, and is also moderately frost tolerant. Prune every now and then to increase the compactness of this plant.

1m x 2m

SENNA ARTENISIOIDES 'SILVER CASSIA'

Small woody shrub with a silvery appearance created by short white hairs on the branchlets and leaves. Leaves are pinnate, 2-4cm long with 4-8 pairs of leaflets. These are narrowly cylindrical, grey green or silvery. Bright yellow flowers about 1.5cm diameter are borne in small clusters in the leaf axils. These are followed by straight, brown pods.

2m x 2m

TEMPLETONIA RETUSA 'COCKIES TONGUES'

An attractive shrub is very hardy with dark red pea shaped flowers 4 cm long occur in clusters during winter and early spring. Has a smooth stem with angular branches and an open textured crown, leathery oblong light green leaves. Prefers a light alkaline well-drained soil in an open sunny position, drought resistant but frost tender.

2m

SHRUBS

ATRIPLEX RHAGODIOIDES 'SILVER SALT BUSH'

A low, spreading shrub with soft grey foliage and small, inconspicuous flowers. A hardy plant suited to dry areas, it grows well in full sun and tolerates sandy, loamy and saline soils. Drought and frost tolerant, it is useful for groundcover, erosion control and low maintenance landscapes.

1.5 - 3m

WESTRINGIA EREMICOLA 'LAVENDER BREEZE'

Graceful, open shrub with stiff erect branches & hairy foliage, pretty white, blue or mauve flowers in Spring and Summer. Attracts Rayed Blue butterfly. Frost, salt & wind tolerant. Most well drained soils. Full sun or part shade.

1.5m x1m

BANKSIA ORNATA 'DESERT BANKSIA'

Suitable as a decorative specimen plant or in a mixed native garden. Soil must be well drained and is very intolerant of heavy soils. Success can be achieved by planting in raised beds in warm dry areas. Attracts nectar feeding and seed feeding birds. Full sun or part shade

1 - 2m

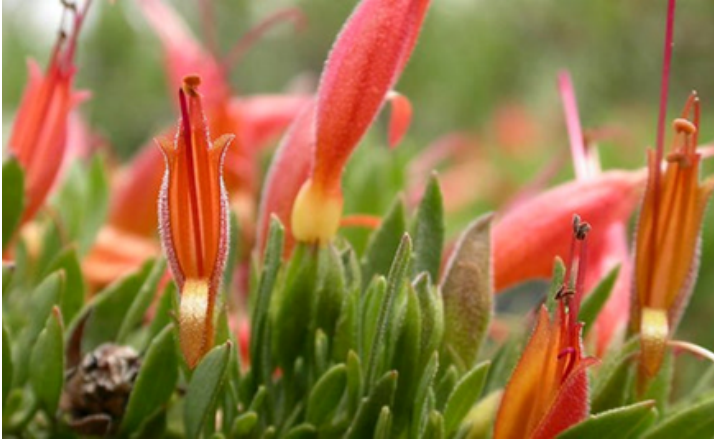

BANKSIA INEGRIFOLIA 'COAST BANKSIA'

A medium to large tree with glossy dark green leaves and silvery undersides, and pale yellow flower spikes that attract birds and pollinators. A hardy coastal species that makes an excellent feature or shade tree with a strong, upright form. It grows best in full sun in sandy to loamy soils and tolerates wind, salt and periods of drought.

3m x2m

SHRUBS

EREMOPHILA GLABRA – RED FLOWER 'RED EMU BUSH'

A compact shrub that thrives in the arid interior of Australia. Its delicate, tubular flowers in shades of red, orange, and yellow bloom from autumn to summer, complemented by the soft grey-green foliage. This versatile plant can thrive in dry climates with proper drainage and plenty of sun, and can even tolerate frost and drought.

3 x 2m

CORREA REFLEXA AUREA 'GOLDEN NATIVE FUCHSIA'

A compact native shrub with soft green foliage and bright golden yellow bell-shaped flowers that appear through the cooler months. A hardy and attractive garden plant that provides colour while attracting birds and pollinating insects. It grows well in full sun to part shade in well drained soils and tolerates drought and light frost once established.

.5 x 1m

SCAEVOLA AEMULA 'MAUVE CLUSTERS'

A low spreading shrub with soft green foliage and masses of mauve fan-shaped flowers that bloom over a long period. An excellent groundcover or border plant that adds colour while attracting birds and pollinating insects. It grows best in full sun in well drained sandy or loamy soils and tolerates coastal conditions, drought and light frost.

0.2 x 0.3m

LEUCOPHYTA BROWNII 'CUSHION BUSH'

A compact rounded shrub with fine silver foliage and small yellow button flowers that create striking contrast in the garden. A hardy coastal plant ideal for borders, feature planting and low maintenance landscapes. It grows best in full sun in well drained soils and tolerates drought, wind, salt spray and light frost.

0.4-1m

GROUNDCOVER/GRASSES/CLUMPING

HARDENBERGIA VIOLACEA 'SEA OF PURPLE'

Vigorous climber or trailing plant that will provide dense cover to just about anything- including walls, steep banks, pergolas and fencing. With purple flowers in winter and spring. Respond to hard pruning to improve shape and form. Can be trained to climb. Attracts native butterflies, caterpillar food source.

1.2 x 4m

DIANELLA REVOLUTA 'BLUE FLAX LILY'

A hardy clumping plant with strappy blue green foliage and small blue flowers followed by decorative purple berries. An attractive choice for borders, mass planting and low maintenance gardens, providing habitat for birds and insects. It grows well in full sun to part shade in a range of well drained soils and tolerates drought and frost once established.

1.2 x 4m

LOMANDRA LONGIFOLIA 'MAT-RUSH'

A tough clumping plant with long arching green foliage and small creamy yellow flowers hidden within the leaves. A versatile choice for borders, mass planting and erosion control, providing texture and year round interest in the garden. It grows well in full sun to part shade in a wide range of soils and tolerates drought, frost and coastal conditions once established.

1 x 1m

POA POIFORMIS 'COASTAL TUSsock GRASS'

A hardy clumping grass with fine blue green foliage and soft flowering heads that move gracefully in the wind. An excellent choice for borders, mass planting and coastal landscapes, adding texture and natural movement to the garden. It grows best in full sun in well drained soils and tolerates drought, wind, salt spray and frost once established.

1 x 1m
